# SecurSeal<sup>®</sup>

## Tamper Evident Syringe & Container Seals

SecurSeal<sup>®</sup> syringe and container seals are non-sterile, curl free with a universal size that is ideal for use on most syringe caps, needle covers, pill vials and cartons.

Once applied, these boldly labeled, tamper evident seals self-destruct upon attempted removal — alerting the user to possible tampering.

Unused medication that is returned to the pharmacy with the SecurSeal<sup>®</sup> intact, may be reissued\*\*

**At last... a syringe seal that does NOT curl!**
